Job Description

Duties and Responsibilities:

Read and interpret blueprints, drawings, and specifications to determine layout of sprinkler systems

Follow hydraulic calculation requirements and design specifications

Install steel and CPVC (Blazemaster) fire sprinkler systems

Cut, thread, groove, and connect piping using hand and power tools

Install sleeves prior to concrete pours and core through existing concrete as required

Install sprinkler heads, valves, controls, and related fittings in accordance with manufacturer specifications and applicable codes

Install fire pumps, jockey pumps, control panels, and underground piping connections

Install seismic sway bracing for earthquake protection

Adjust system layouts on site to ensure compliance with NFPA and applicable fire codes

Inspect, test, maintain, and repair sprinkler systems

Troubleshoot and replace defective components

Ensure all work is performed in accordance with safety regulations and company policies

Requirements:

Completion of secondary school is required

Completion of a recognized sprinkler fitter apprenticeship program OR minimum 2-3 years of related work experience as a sprinkler system installer

Trade certification (Sprinkler Fitter) is an asset

Ability to read and interpret technical drawings and blueprints

Physically capable of lifting heavy materials and working at heights

English language proficiency is required
