Job Description

Duties:

- Report necessary maintenance matters, including Service Difficulty Reports (SDRs), to the VP of Maintenance and/or PRM (Maintenance Postholder).
- Process manufacturer (O.E.M) requirements, Airworthiness Directives, and Service Bulletins for applicability and inclusion in the maintenance program.
- Ensure maintenance requirements, including specialized tasks and technical dispatch tasks, are correctly identified, referenced to applicable publications or documents, and recorded.
- Review and process weight and balance changes and approve configuration adjustments.
- Oversee aircraft lease and maintenance arrangement requests to ensure compliance, serving as a liaison to facilitate required approvals and certification.
- Support PRM (Maintenance Postholder) in identifying, approving, and amending specialized and calibrated tooling requirements.
- Collaborate with Flight Standards to create, update, and manage aircraft Minimum Equipment Lists (MEL) through to regulatory approval.
- Support the procurement process to ensure parts, vendors, and suppliers are approved or qualified for the intended scope of work.
- Process repair, modification, deviation, and extension requests to ensure compliance and documentation of approvals.
- Identify and process off-wing maintenance activities to ensure work scope accuracy and compliance documentation.
- Support commercial requests for aircraft technical information, including specifications and configurations.
- Perform other duties as assigned.

Requirements:

- Completion of a college or university program in Aircraft Maintenance, Aviation Technology, Aerospace Engineering, Mechanical Engineering or other related discipline OR a minimum of 5 years' experience in an aviation regulatory compliance related role (e.g., D.O.M, PRM (Maintenance Postholder), Technical records and/or Maintenance Manager) is required.
- Possession of a TCCA AME M licence or equivalent is required.
- A minimum of 10 years' experience in rotary wing maintenance is preferred.
- Proven technical aptitude, experience and ability to diagnose maintenance compliance requirements effectively.
- Must demonstrate strong computer proficiency. Prior experience with maintenance or MRO tracking software (WinAir, AMOS, Ramco etc.) is preferred.
- Must demonstrate excellent interpersonal skills with the confidence to influence all internal stakeholders and external bodies.
- Must have strong communication, planning, time management, and organizational skills.
- English language is required.
