Job Description

Duties:

• Troubleshoot aircraft structural, mechanical, hydraulic systems or electrical systems to identify defects and adjust/repair systems in accordance with regulatory standards and maintenance manual procedures.
• Repair and overhaul aircraft structural, mechanical, hydraulic systems, or electrical systems.
• Install or modify aircraft engines and mechanical, hydraulic, flight control, fuel, and electrical systems.
• Dismantle airframes, aircraft engines, or other aircraft systems for repair, overhaul, and cleaning, and reassemble components or airframes.
• Perform and document routine maintenance and inspections on aircraft.
• Accurate completion and certification of logbooks, work orders, and other associated maintenance records utilizing WinAir software system.
• Ensure all components, parts, and materials utilized in the maintenance, repair, modifications, or overhaul of aeronautical products are correctly certified.
• Ability to plan and perform scheduled maintenance in accordance with the maintenance forecast generated from WinAir when working alone in the field.
• Demonstrate continuous effort to improve operations, decrease turnaround times, streamline work processes, and work cooperatively and jointly to provide quality, seamless service without compromising safety and quality.
• Work effectively in a team environment to maintain a high level of production.
• Provide mentorship to assigned apprentice aircraft maintenance engineers.
• Maintain and ensure a clean and safe work environment.
• Adhere to workplace safety policies, regulations, and compliances and actively participate in Custom Helicopters’ Safety Management System, including reporting hazards and incidents encountered during daily operations.
• Travel to remote locations as needed to repair and maintain aircraft in the field.
• May perform other duties as assigned.

Requirements:

• Completion of secondary school is required.
• Completion of a diploma in Aircraft Maintenance or related discipline OR Completion of a 4-year apprenticeship program in Aircraft Maintenance is required.
• Must have at least 3 years of work experience in Aircraft Maintenance, preferably with helicopters.
• Must hold a valid Transport Canada Aircraft Maintenance Engineer Licence with an M1 or M2 rating, and an endorsement for the following models: AS350, B407, AS332L2, and SK76.
• Must be able to lift and carry tools, supplies, materials, and equipment.
• Must be able to operate hand, air, and power tools from floor to above shoulders.
• Must be able to stand on concrete and asphalt for extended periods; bend, stoop, kneel, and climb to perform various tasks; climb ladders and scaffolding to access parts of aircraft; and general ability to work in awkward, uncomfortable positions for extended periods.
• Must have a high level of accountability with strong communication, analytical thinking, organizational, prioritization, and time management skills.
• Must be able to multi-task and prioritize assignments in a fast-paced and safety sensitive environment.
• Must be able to travel, both to domestic and international locations, on short notice.
• Must possess a valid Driver’s Licence and a valid, current passport.
• Must provide own tools.

- Must be able to lift items over 50 lbs (23kg).
