Company Information

Kuusoft Software Corp. is a software solutions company based in Burnaby, BC, founded in 2002. We develop innovative digital products and technology solutions for businesses across a wide range of industries, including retail, hospitality, healthcare, banking, education, and food service.

One of our flagship products is NexSigns, a cloud-based digital signage platform that gives businesses full control over their digital screen content. NexSigns is used by national and international brands across North America to create, manage, and distribute dynamic visual content across their digital displays — from restaurant menu boards and retail promotional screens to hotel lobbies, bank branches, and corporate offices.

As part of our service offering, we provide clients with content production support to help them create effective video content for display on their NexSigns digital signage systems. In addition to client-facing content, we produce our own corporate, product, training, and marketing videos to support our brand communication, product promotion, and YouTube channel.

To meet our growing video production needs across both internal and client-facing content, we are seeking a skilled Video Producer to join our team.

How to Apply

If you are passionate about video production, visual storytelling, and digital media content creation, and are dedicated to producing high-quality, brand-aligned video content, we invite you to apply for the Video Producer position by sending your resume and portfolio to job.hr@kuusoft.com.

We thank all applicants for their interest; however, only those selected for an interview will be contacted. No phone calls or walk-ins, please.

Job Description

Key Responsibilities

The successful candidate will be responsible for the following duties:

- Plan, organize, and coordinate video production projects from concept development and pre-production planning through to filming, editing, review, and final delivery, for both internal Kuusoft content and client content projects.
- Produce corporate, marketing, training, product-related, YouTube, and social media video content to support Kuusoft's digital signage products and brand communication.
- Work with clients and account managers to understand client content requirements, and produce industry-specific video content and templates for clients in retail, hospitality, healthcare, banking, and food service sectors for deployment on NexSigns digital signage displays.
- Determine the style, scope, production timeline, technical requirements, and visual direction for assigned video projects.
- Film interviews, explainer videos, studio shoots, office-based shoots, on-location client shoots, product demonstrations, and other video content using professional video, lighting, and audio equipment.
- Direct and coordinate filming activities to ensure the desired visual style, message, and presentation are achieved.
- Edit videos and create post-production elements, including motion graphics, captions, visual overlays, transitions, colour correction, sound mixing, and final exports.
- Work with marketing, design, sales, and internal teams to review drafts, collect feedback, complete revisions, and ensure all video content meets Kuusoft's brand standards and communication goals.
- Manage video project files, media assets, production timelines, equipment preparation, workflow, and production archives.

Job Requirements

- A university degree or college diploma in film production, motion picture, media production, broadcasting, or a related field is required.
- At least 3 years of hands-on experience in video production, including filming, editing, post-production, and project coordination, is required.
- Demonstrated creative ability in video production and visual storytelling is required.
- Proficiency in Adobe Premiere Pro, After Effects, or similar video editing and post-production software is required.
- Experience with camera operation, lighting setup, audio recording, motion graphics, colour correction, sound mixing, and media management is required.
- Experience producing commercial, corporate, or branded video content for external clients or business audiences is required.
- Experience with DaVinci Resolve, Final Cut Pro, Photoshop, or other creative software is an asset.
- Ability to manage video projects from pre-production planning to final delivery.
- Strong attention to detail, organization, communication, and time-management skills.
- Ability to work with internal teams and external clients, and manage feedback and review cycles.
- English language proficiency is required for workplace communication.
