Carpenter Lead Hand – Modular Installation

Company: Phoenix Modular
Email resume to: Attention Karli- admin@phoenixmodular.ca
Location: Calgary, Alberta, with regular travel throughout Western Canada
Employment Type: Full-time, Permanent
Expected Hours: 40 hours per week
Pay: \$36.00–\$38.00 per hour, based on experience
Language of Work: English

About the Position

Phoenix Modular is seeking an experienced Carpenter Lead Hand to join our field installation team. This is a hands-on construction position supporting the installation, assembly, modification, repair, relocation and dismantling of modular buildings and structures.

The successful candidate will bring strong carpentry and modular construction experience and be capable of taking a lead role on site when required, including supporting crew coordination, quality control and the safe execution of modular installation work.

This is a Calgary-based position. The successful candidate must be available to report to and work from the Phoenix Modular yard in Calgary when not assigned to a project site. This is not a fly-in/fly-out position.

Regular travel throughout Western Canada is required and may include extended assignments at remote project locations. Candidates must be comfortable travelling up to 100% of the time when project schedules require it.

Job Description

Responsibilities

Read and interpret architectural drawings, construction plans, structural details, specifications and modular assembly documents

Measure, cut, shape, assemble and install wood and other construction materials

Construct, install, modify and repair walls, floors, roofs, partitions, framing, blocking and other structural components

Perform hands-on carpentry associated with the installation and integration of modular buildings and structures

Support and coordinate the placement, setting, alignment, levelling and secure connection of modular building units

Work with crane operators, equipment operators and site personnel during module delivery, lifting, positioning and installation

Assist with rigging and signalling activities where properly trained and authorized

Complete structural connections, blocking, framing, sealing, finishing and other carpentry work required during modular installation

Coordinate with electrical, plumbing, HVAC and other trades during module integration and stitch-work while ensuring trade-specific work is completed by the appropriate personnel

Install doors, windows, trim, fixtures and finishing components as required

Complete repairs, renovations and modifications to existing modular structures

Inspect completed work for alignment, level, squareness, fit, finish, weatherproofing and overall quality

Identify and troubleshoot field installation issues, dimensional conflicts, structural misalignments and other site conditions

Assist with resolving installation challenges efficiently while maintaining safety, quality and project requirements

Support the sequencing of module deliveries and site activities to maintain an efficient installation process

Provide direction and hands-on guidance to other field crew members when required

Assist with assigning and coordinating daily work activities when acting in a lead capacity

Support the training and mentoring of less-experienced carpenters, technicians and field personnel

Safely operate hand tools, power tools and construction equipment for which the employee is trained and authorized

Work safely around cranes, telehandlers, aerial work platforms and other powered mobile equipment

Maintain a safe, clean and organized work area

Follow Phoenix Modular safety procedures and all client and project-specific site requirements

Work effectively with project managers, site supervisors, other trades, subcontractors and field personnel

Complete work efficiently while maintaining quality and safety standards

Travel to project sites throughout Western Canada, including remote locations, as required

Report to and perform work from the Phoenix Modular yard in Calgary when not assigned to a project site

Minimum Qualifications

Minimum 5 years of professional carpentry experience required

Minimum 2 years of hands-on modular construction experience required

Demonstrated experience with modular installation, relocation and dismantling required

Previous experience in a lead hand, senior carpenter or crew leadership capacity considered a strong asset

Strong hands-on knowledge of commercial carpentry, framing, structural connections and modular construction

Demonstrated ability to read and interpret construction drawings, plans, specifications and structural details

Experience with module setting, alignment, connection and finishing

Ability to identify and resolve field installation and construction issues

Must be available to report to and work from the Phoenix Modular yard in Calgary when not assigned to a project site

Must be willing and able to travel throughout Western Canada, including remote project locations

Must be willing and able to travel up to 100% of the time when required by project schedules

Must be comfortable working away from Calgary for extended project assignments

Must be willing to complete pre-employment drug and alcohol testing as a condition of employment

Must be fit for duty and able to safely perform the physical requirements of the position

Strong commitment to workplace and construction-site safety

Ability to work independently and as part of a field crew

Ability to provide direction and support to other crew members when required

Reliable and able to work effectively in a fast-paced construction environment

Ability to safely perform physically demanding construction work, including lifting up to 50 lbs., carrying, climbing, bending, working at heights and working outdoors in varying weather and site conditions

Safety Certifications / Training

Candidates must hold the following certifications or be willing and able to obtain them prior to deployment to a project site:

CSTS 2020

WHMIS

Fall Protection

Telehandler / Zoom Boom Operator Training

The following training and experience are considered assets:

Aerial Work Platform / Elevated Work Platform Training

Rigging and Signalling Training

Standard First Aid / CPR

Previous experience working around crane operations and modular building lifts

Additional project-specific safety training or certifications may be required depending on the client, project site or scope of work.

Work Requirements

Full-time availability

Approximately 40 hours per week, with overtime or additional hours potentially required based on project schedules

Ability and willingness to travel throughout Western Canada

Travel may be required up to 100% of the time during active project assignments

Ability to work at remote and temporary construction sites

Ability to work outdoors in varying weather conditions

Ability to work from the Phoenix Modular yard in Calgary when not assigned to a project site

Flexibility to accommodate changing project schedules, travel requirements and site conditions

Phoenix Modular is looking for an experienced, safety-focused Carpenter Lead Hand who understands modular construction, can take ownership of work in the field and is comfortable providing hands-on leadership when required. The successful candidate will combine strong carpentry skills with practical modular installation experience, sound judgment and the ability to work effectively with crews, equipment operators and other trades.
